Phonology

Cons.	Labial	Alveolar	Velar
Nasal	m	n	
Stop	p	t	c /k/
Fricative	f	s l	
Approx.	w		y /j/
Rhotic		r /r̥/	

Vowels	Front	Back
Close	i	u
Mid	e	o
Open	a	

While <r> is officially /r̥/, <r> can be the rhotic sound of the speaker's native language.

Ditto for <w>, flexibility is granted for anything up to /v/ (so /β/ and /v/ are allowed but not /f/ or /ϕ/).

^ these two parts broke me mentally

/e/ is allowed to be pronounced as any unrounded mid-front vowel, except for /ə/.
